How Micepad helped Business Next (TW) increase audience engagement

Case Study

Business Next

The Client

Founded in 1999, Business Next(BN) is the longest-running media organisation in Greater China, with a focus on the world's tech and finance. Employing some of Taiwan's finest contemporary writers, editors, creative marketing professionals and media producers, BN follows where Taiwan's "beat" goes - to places of creativity, innovation and entrepreneurialism.

BN & Micepad

Founded in 1999, Business Next(BN) is the longest-running media organisation in Greater China, with a focus on the world's tech and finance.

Employing some of Taiwan's finest contemporary writers, editors, creative marketing professionals and media producers, BN follows where Taiwan's "beat" goes - to places of creativity, innovation and entrepreneurialism.

BN & Micepad

With 500+ attendees, this yearly event invites internationally successful entrepreneurs, venture capital representatives, and other field experts to share advice and experience.

This was a particularly exciting event, as Micepad has just updated itself to the brand new v.8 model, with new features, tracking and data analytics. Upgrades had been done to the interactive features as well, in particular the polling, Q&A and word cloud functions.

The Results

The event was yet another success for Business Next and Micepad, with BN being especially impressed with the new data tracking and word cloud functions.

“

Micepad has outdone itself yet again. We had [previously] asked for more data reporting and a better word cloud projector and they really did make it happen.

”

Isaac Yong,
Senior Community Planning Manager
